DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4 and 16-20, drawn to a nonvolatile semiconductor memory cell, classified in class 257, subclass 260+.

Group II, claim(s) 5-15, drawn to a method for fabricating a nonvolatile semiconductor memory cell, classified in class 438, subclass 22+.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I refers to a nonvolatile memory cell that has two insulation layers formed above and below an electrically non conductive storage layer while Group II, refers to a method of fabricating a nonvolatile semiconductor memory cell with an additional insulation layer in order to create word lines. Both groups require two separate searches.
